# FASTBIND CASEMATIC XT

## ON-DEMAND HARD-COVER MAKING

Casematic XT represents a new step forward in Fastbind range for on-demand hard cover making. In a short time, you can be producing high-quality books in a wide variety of formats, from A5 to A3+. Once the cover is built, you can use a Fastbind binder to bind the content with either perfect binding or free-floating spine (lay-flat).

Fully featured and compact, this table top unit can fit naturally in any environment and cover all short runs and on-demand needs.

## BUILT-IN LIGHT TABLE

The unique card board positioning method makes it quicker than ever to register your board on the printed tacking cover: the light table includes a centre line, scaled and top line for the most accurate settings. A suction assistance for placing the tacking paper is controlled by a foot pedal.

To complete this remarkable list of attributes, Fastbind Casematic XT also integrates a user-friendly edge-folding unit, with an adjustable roller gap for an easier operation. Anyone can create professional quality customized luxury book in minutes!

## OTHER APPLICATIONS

The original design of the Fastbind Casematic XT allow not only to create book covers, but any other fully decorated hard cases: CD and DVD boxes, restaurant menus... You just need to change the two spine guides from a 8mm-groove to a 3mm one.

## FASTBIND SUPPLY PROGRAM

Fastbind can supply all the necessary materials to produce hard covers in a print-on-demand environment. The product family consists of printable tacking sheets (for laser or inkjet), adhesive endpapers, grey boards and laminating materials.

## SPECIFICATIONS

	Europe	USA
